DETAILED ACTION

Response to Amendment

1. Applicant's arguments with respect to claims 10-26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims **10-13, and 16-26** are rejected under 35 U.S.C. 102(e) as being anticipated by **Aoki (US Patent No: 5,438,359)**.

As to claim 10, Aoki teaches that a circuit card (Fig. 1, items 1, 3), which can be fitted to a card slot (Fig. 1, item 23, col. 2, lines 65-68) device for personal communication (col. 2, lines 50-68), data collection, and data processing, and comprising: optics built in said circuit card for obtaining image information (col. 3, lines 44-55); an image sensor in said circuit card for obtaining image information (col. 3, lines 50-61); an image processing unit in said circuit card (col. 3, lines 44-61, and col. 4, lines 31-53); a memory unit in said image processing unit for storing obtained image information (col. 4, lines 21-53); and a processor unit in said image processing unit for processing obtained image information (col. 4, lines 31-45).

As to claim 11, Aoki teaches that wherein said memory unit comprises at least volatile and non-volatile memory (col. 3, lines 55-61).

As to claim 12, Aoki teaches that a circuit card according to claim 10, further comprising a power supply for providing power to maintain said obtained image information in said memory unit (col. 4, lines 3-30).

As to claim 13, Aoki teaches that wherein said image sensor is a semiconductor camera (col. 2 through col. 3, lines 65-61).

As to claim 16, Aoki teaches that further comprising means for performing a character recognition task on image information obtained by said image sensor for generation a set of recognized characters (col. 3, lines 34-61).

As to claim 17, Aoki teaches that wherein said means for performing a character recognition task comprises a software program stored in the memory unit of the circuit card (col. 5, lines 19-47).

As to claim 18, Aoki teaches that further comprising means for performing a pattern recognition task on a graphical object in said image information obtained by said image sensor (col. 4, lines 21-53, and col. 5, lines 19-47).

As to claim 19, the claim is rejected for the same reason as set forth in claim 17.

As to claim 20, the claim is rejected for the same reason as set forth in claim 10.

As to claim 21, the claim is rejected for the same reason as set forth in claim 10.

As to claim 22, the claim is rejected for the same reason as set forth in claim 16.

As to claim 23, the claim is rejected for the same reason as set forth in claim 17.

As to claim 24, the claim is rejected for the same reason as set forth in claim 18.

As to claim 25, the claim is rejected for the same reason as set forth in claim 17.

As to claim 26, the claim is rejected for the same reason as set forth in claim 10.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims **14-15** are rejected under 35 U.S.C. 103(a) as being unpatentable over Aoki in view of **Parulski (US Patent No: 5,475,441)**.

As to claim 14, Aoki does not teach a circuit card according to claim 10, further adapted to fit into a card slot of a device for personal communication, data collection and data processing that is a PCMCIA compatible card slot.

Parulski teaches further adapted to fit into a card slot of a device for personal communication, data collection and data processing that is a PCMCIA compatible card slot (col. 6, lines 53-58). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a PCMCIA compatible card as taught by Parulski to the system of Aoki in order to transferring image data to a personal computer.

As to claim 15, the claim is rejected for the same reason as set forth in claim 14.
